

# WELCOME.

You just bought a NIXON watch. How about that. Welcome to the NIXON side, a side that's about custom-built product, quality, and durability.

We're stoked you selected one of our watches. The fact that you bought a NIXON means you can probably tell time, but you may not be familiar with all the doodads and features of our watches. So if you're stuck, read through these instructions. Or get your friends to read them and then they can tell you what's up.

\*RINSE WATCH WITH SOAP AND WATER AFTER EXPOSURE TO SALT WATER OR SAND.

Replace the battery at least every two years. Dead or low batteries left in a watch may leak and destroy the movement of your watch. If you have a water resistant watch, the water resistance is attained using rubber or plastic seals which will deteriorate under normal conditions and reduce the water resistance of your watch. These seals should be checked by an authorized jeweler at least every two years to ensure the rated water resistance. Do not use a watch in water with a temperature above 60°C or 140°F, under -10°C or 14°F. No hot tubs or saunas. Sorry, but you do really need to know the time when you're not tubing? Avoid extreme shocks.
